One of the most useful features of *tGUB* is its **Research Window** -- the window that is opened whenever a link is clicked.

The idea is to preserve your **Original Context**, so that you can revert to it whenever you wish, and to target links you click into the *Research Window*.

And so, whenever you click a subsequent link, it will be displayed in the Research Window.

*For most effective use, the **Original Context** and **Research Windows** should be arranged side-by-side, as shown below.*

Foreword

0:0.1 IN THE MINDS of the mortals²¹ of Urantia — that being the name of your world — there exists great confusion respecting the meaning of such terms as God²², divinity²³, and delity²⁴. Human beings are still more confused and uncertain about the relationships of the divine personalities designated by these numerous appellations. Because of this conceptual poverty associated with this introductory statement in word symbols as they may be of truth revealers have been

0:5.10 It is exceedingly difficult to present enlarged concepts and advanced truth, in our endeavor to expand cosmic consciousness and enhance spiritual perception, when we are restricted to the use of a circumscribed language of the realm. But our mandate admonishes us to make every effort to convey our meanings by using the word symbols of the English tongue. We have been instructed to introduce new terms only when the concept to be portrayed finds no terminology in English which can be employed to convey such a new concept partially or even with more or less distortion of meaning.

0:8.9 In the hope of facilitating comprehension and of preventing confusion on the part of every mortal²¹ who may peruse these papers, we deem it wise to present in this initial statement an outline of the meanings to be attached to numerous English words which are to be employed in designation of Delity²⁴ and certain associated concepts of the things, meanings, and values of universal reality.

0:8.11 But in order to formulate this Foreword of definitions and limitations of terminology, it is necessary to anticipate the usage of these terms in the subsequent presentations. This Foreword is not, therefore, a finished statement within itself; it is only a definitive guide designed to assist those who shall read the accompanying papers dealing with Delity²⁴ and the universe²⁵ of universes²⁶ which have been formulated by an Oivanton²⁷ commission sent to Urantia²⁸ for this purpose.

0:12.12 Your world, Urantia²⁸, is one of many similar inhabited planets which comprise the local universe²⁹ of Nebadon³⁰. This universe²⁹, together with similar creations, makes up the superuniverse³¹ of Omniton³², from

As you will see, tGUB provides support for both single and multi-words terms and it is important to understand how this is presented to the user.

For example, the term “Jesus of Nazareth” actually represents three distinct glossary entries, i.e., “Jesus,” “Nazareth”, and “Jesus of Nazareth” and each of these terms can be researched separately.

In the case above, when viewing the Glossarized entries with the English text, you will notice the following:

Jesus[^] of Nazareth^{^^}

If you mouseover the term “Jesus” you will get information specifically, and only, about “Jesus”. Likewise if you mouseover the term “Nazareth” you will get information specifically, and only, about “Nazareth”.

BUT, notice the fact the term “Nazareth” is followed by two carets (“^^”). This indicates that it is the **end of a multi-word term**. To see the results for the entire multi-word term – YOU MUST PLACE THE CURSOR AT THE START OF THE TERM. In the case of “Jesus of Nazareth” you would place the cursor just **before** the word “Jesus” to see the results for the entire term.
